SHOWER CURTAIN RAIL »EMILIA«

DURABLE. RELIABLE. RESPONSIBLE.

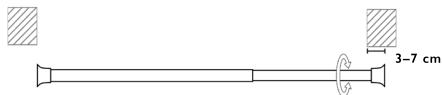

SCOPE OF SUPPLY

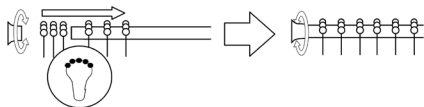

1x Stainless steel shower curtain rod, consisting of two rods and a spring mechanism, 2x Slip-resistant end caps (already installed), 12x Stainless steel shower curtain rings

INSTRUCTION

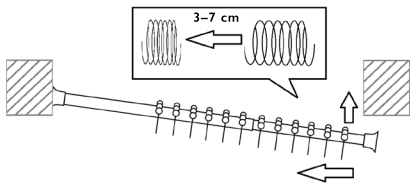

Step 1: Change the length of the rail by turning the inside rod until reaching a length that measures 3–7 cm more than the desired length.

Step 2: Remove one of the end caps by twisting it. Put the needed number of shower curtain rings onto the rail. Now reinstall the end cap.

Step 3: Press the rod together in order to compress the spring mechanism. After placing the end caps at the desired place, you can release the rod. Check the rigidity of the rod and proceed to mount your shower curtain (not included).
