

Laakfeld
SHOWER RACK
»MIA«

DURABLE. RELIABLE. RESPONSIBLE.

CONTENTS:

1x stainless steel shower basket, 1x razor holder,
2x additional spacer caps as a replacement

INSTRUCTIONS:

Place the shower basket under the faucet so that the sheathed hangers face up and the shower basket faces forward. Pass one of the upper hangers from below between the wall and the faucet. Then place it from above on the corresponding faucet inlet (wall connection).

Carefully press both hangers together. Place the second suspension also between the wall and the fitting and place it from above on the second fitting inlet.

Alternatively, carefully squeeze the main rods together just below the top hangers and simultaneously pass both hangers between the wall and the faucet from below, with the basket facing forward. Carefully release so that the suspensions return to their original position.

Carefully place on the faucet inlets (wall connections) from above. The shower basket is equipped with two spacer caps which, together with the encased suspension, prevent the stainless steel from rubbing directly against the wall.

Hang razor holders in the shower basket as needed.
